Full-Stack Developer

GitHub Profile | Linkedin Profile | Leetcode Profile | YouTube Profile

SKILLS

Frontend Development :

- HTML5, CSS3, React.js, Tailwind CSS, UI/UX

Backend Development :

- Node.js, Express.js, Authentication & Authorization

Programming Languages :

- JavaScript, C, C++, Java

Database & Data Management :

- MongoDB, REST APIs

Computer Science Fundamentals :

- Object-Oriented Programming (OOP)

Tools & Deployment :

- Git, GitHub, Postman, VScode, Netlify

EDUCATION

- **[Your University Name]**
  Bachelor of Engineering
  2022 - 2026
- **[Your High School Name]**
  Higher Secondary Education
  2020 - 2022

CERTIFICATIONS

- **AI Tools and Workshop**
  Issued by Be-10X (2025)

LANGUAGES

- English
- Hindi
- Gujarati

PROJECTS

ContentCraft AI SaaS

- Engineered a high-performance content generation platform utilizing React.js, Tailwind CSS, and cutting-edge LLM APIs to draft instant viral marketing copy.
- Implemented real-time conversational streaming mechanisms for generating dynamic multi-platform content.
- Designed highly responsive interactive dashboards mapped directly with advanced prompt engineering systems to dramatically accelerate user writing workflows.

Tech Stack : React.js, Tailwind CSS, Node.js, Express, LLM API

GitHub Link **Live Demo**

Interactive Website Clones (6x)

- Architected and deployed 6 pixel-perfect, high-fidelity clones of major enterprise application screens (Paytm, cPanel, Mozilla).
- Utilized vanilla HTML/CSS along with core JavaScript to build robust, component-driven layouts.
- Achieved fully responsive flexbox/grid integration across all active viewports to emulate complex real-world application architectures without structural failure.

Tech Stack : HTML5, CSS3, JavaScript (ES6+)

GitHub Link **Live Demo**

Modern E-Commerce Solution

- Developed a comprehensive eCommerce platform implementing client-side routing, cart state management, and functional inventory tracking utilizing the MERN stack.
- Integrated secure JWT authentication flows with deep MongoDB aggregation frameworks for querying complex product taxonomy structures.

Tech Stack : React.js, Node.js, Express.js, MongoDB, JWT

GitHub Link **Live Demo**

ACHIEVEMENTS

- Designed and developed 10+ robust web applications and clones demonstrating high-level proficiency in modern frontend frameworks and responsive design principles.
- Continuously refining algorithmic problem-solving skills across competitive programming platforms including LeetCode.
